PROFILE

I am an intrinsically motivated designer based out of Lakeland Florida. From the time I was a 16 years old working at Publix to now, I've longed to make the world a better place by creating seamless and captivating user experiences for consumers.

EXPERIENCE

Publix Supermarkets

Front Service Clerk • February 2016 - March 2018

Grocery Clerk • March 2020 - August 2021

- Ensured that over 5000 daily guests had access to goods and services as a grocery clerk. This experience was the first of many that ignited my passion for aiding the consumer.

Retail Automation

November 2017 • Current

- Handling various softwares over the course of five years to enable myself to purchase limited items, allowed me to vicariously observe the product's design systems companies set out to use. Giving me the opportunity to expand my design knowledge, and understand how a user experience should follow.

PremeNews Web Designer

PremeNews • May 2022

- Redesigned and developed a central hub from the ground up for a multi million dollar sneaker reselling community, *PremeNews*. The PremeNews site functions as a way to onboard new members, manage subscriptions, and outline featured services within the group.

EDUCATION

UX/UI Boot Camp

August 2021 • March 2022, University of Central Florida, Orlando, Florida

- During this six month period, I appreciated the information and resources given to further my success. Through rigorous assignments and near due dates; I was able to comprehend the information through all regions of user experience.

PROFESSIONAL CERTIFICATES

- Adobe Certified - Premiere Pro, 2018
